# Sealant SIL-744 for connector with sealant injection

**In outdoor installations the Connector/Cable interface is very sensitive to water ingress. The Sealant injection waterproofing method creates a quick, secure seal between the back nut and jacket ! outer conductor.**

**The SIL-744 is recommended to be used with all EUPEN connectors where sealant injection is required.**

**The SIL-744 is supplied either in a box with a 90 ml tube of sealant including connector adapter and key or in a tube containing 310 ml.**
