New low density
with outstanding
properties

EUCAVISCO®

A matter of comfort

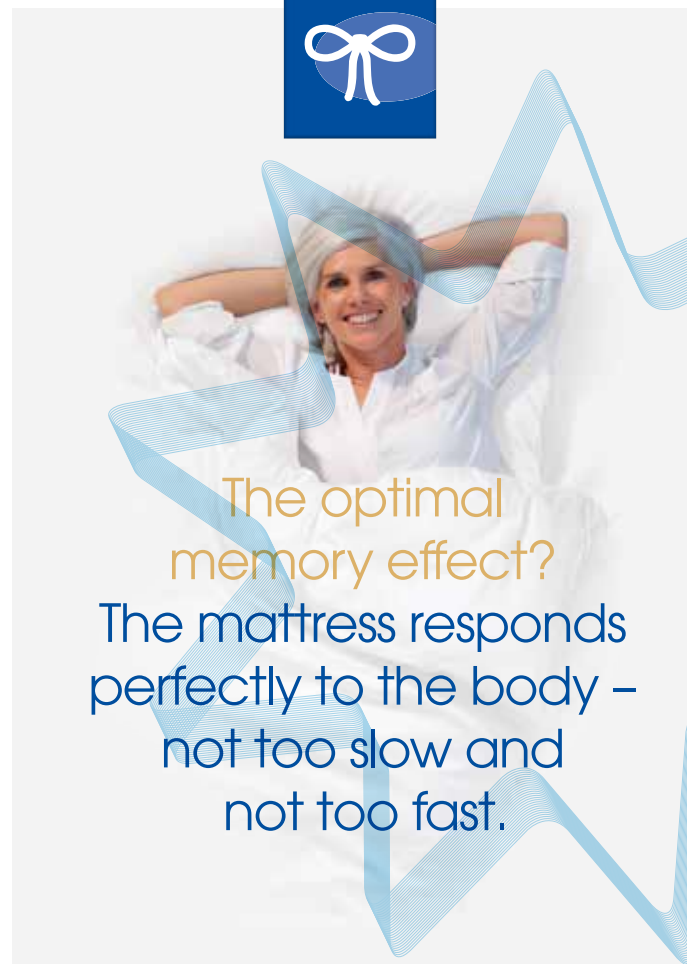

EN

MADE IN EUPEN

A new density for visco-elastic comfort foam

With our new EUCAVISCO® Visco 3510 and Visco 3516 qualities, we offer you low densities with outstanding properties:

- **Special breathability:** The open-pore cell structure enables a very high degree of air circulation.
- **Memory effect:** High-quality raw materials, special stabilisers and optimised catalysis.
- **Outstanding durability:** Safe and low-emission products that go far beyond the required standards.

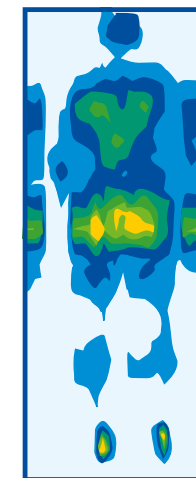

The optimal memory effect?
The mattress responds perfectly to the body – not too slow and not too fast.

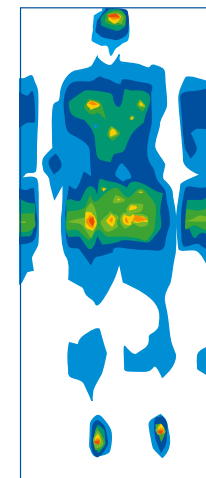

EUCAVISCO® is the ideal foam for maximum comfort. It stands out due to its excellent memory effect combined with special breathability. The foam's carefully selected visco-polyols achieve optimal pressure distribution, thus providing perfect pressure relief for your customers. Be it neck, shoulder or back pain, EUCAVISCO® supports sleeping without pressure points and with orthopaedically correct posture.

Pressure distribution

EUCAVISCO®

Visco-elastic foams

	Quality level	Product	Density (Kg/M ³)	Compression hardness (KPA)
NEW	Classic	Visco 3510	35	1.0
