

Declaration

Declaration DGNB : German Sustainable Building Council

We, Kabelwerk Eupen AG, as producer of cables and wires are not in the position to certify our products according to the guidelines of DGNB (German Sustainable Building Council):

“The DGNB has been committed to demonstrably good buildings and urban districts that are worth living in.”

Basically, cables and wires may only be relevant for the criterion <Risk for the local environment>. For the quality levels 3 and 4, a requirement could be derived as all products used should be “free of SVHC”, respectively having a part of less than 0.1%.

This subject is taken up and confirmed by ourselves through our REACH-declaration. (<https://www.eupen.com/cable/wp-content/uploads/sites/2/EUPEN-Declaration-REACH-Ed-01-2023.pdf>).

Contact person in our company for all questions regarding the REACH regulation:

Christophe REINDERS
Physico-chemical Laboratory Manager
